Provide general first aid, rest, warmth and fresh air. As a general rule, in case of doubt or if symptoms persist, always call a doctor. Seek medical attention for all burns and eye injuries, regardless how minor they may seem. First aid personnel must be aware of own risk during rescue.

#### Inhalation

Remove person to fresh air and keep comfortable for breathing. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Seek medical attention.

#### Ingestion

If this product is ingested, remove victim immediately from source of exposure. Rinse mouth thoroughly. Do not induce vomiting. Provide fresh air, warmth and rest. Get medical attention. Never give anything by mouth to an unconscious person.

#### Skin contact

Remove victim immediately from source of exposure. Remove contaminated clothing, shoes and jewelry and wash before reuse. Wash the skin immediately with water. Obtain medical attention if irritation persists or if blistering occurs.

#### Eye contact

Do not rub eye. If this product contacts the eyes, gently flush eyes with water for at least fifteen (15) minutes, lifting the upper and lower eyelids occasionally. Remove contact lenses if present and easy to do so. Avoid contaminating unaffected eye. Seek medical attention.

### 4.2 Most important symptoms and effects, both acute and delayed

#### General information

The severity of the symptoms described will vary dependent on the concentration and the length of exposure.

#### Inhalation

Inhalation of mist or vapor may cause respiratory tract irritation. There may be shortness of breath with a burning sensation in the throat. Exposure may cause coughing or wheezing.

#### Ingestion

Exposure to liquid product may cause moderate to severe irritation and possible burns to inner linings of mouth, esophagus and gastrointestinal tract.

#### Skin contact

Contact with liquid and mist may result in skin irritation and burns. Progressive ulceration will occur if treatment is not immediate.

#### Eye contact

Extreme irritation of eyes and mucous membranes, including burning and tearing. Corneal burns may occur. May cause permanent damage.

### 4.3 Indication of any immediate medical attention and special treatment needed

#### Notes to the physician

Treat symptomatically.

## Section 5: Fire-fighting measures

### 5.1 Extinguishing media

#### Extinguishing media

Use extinguishing media appropriate for surrounding fire - Dry chemicals, CO<sub>2</sub>, foam, water-spray.

**Unsuitable extinguishing media** None noted.

### **5.2 Special hazards arising from the substance or mixture**

**Hazardous combustion products** When heated, toxic and corrosive vapours/gases may be formed. During fire, toxic gases (CO, CO<sub>2</sub>) are formed.

**Unusual fire & explosion hazards** No unusual fire or explosion hazards noted.

**Specific hazards** If heated, harmful vapours may be formed.

### **5.3 Advice for firefighters**

**Special fire fighting procedures** If possible, fight fire from protected position. Avoid breathing fire vapours. Ventilate closed spaces before entering them. Containers close to fire should be removed immediately or cooled with water if safe to do so.

**Protective equipment for firefighters** Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

Ireland, Occupational Exposure Limits 2018.

**8.2 Exposure Controls**

**Protective equipment**

**Engineering measures**

Provide adequate ventilation, including appropriate local extraction, to ensure that the defined occupational exposure limit is not exceeded.

**Respiratory equipment**

If ventilation is inadequate, suitable respiratory protection must be worn. EN 136/140/145/143/149. The specific respirator selected must be based on contamination levels found in the work place. Where risk assessment shows air-purifying respirators are appropriate a full face respirator conforming to EN143 should be used, and suitable respirator cartridges as a backup to engineering controls.

**Hand protection**

Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374) is recommended. (EU Directive 89/686/EEC). Gloves must be inspected prior to use. Consult manufacturer for advice. Selection of the glove material depends on consideration of the penetration times, rates of diffusion and degradation, and concentration specific to the workplace. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices.

**Eye protection**

Wear safety goggles or face shield to prevent any possibility of eye contact. Use equipment for eye protection tested and approved under appropriate government standards such as EN 166(EU).

**Other protection**

Wear appropriate clothing to prevent skin contact. Acid resistant protective clothing. The selected clothing must satisfy the European norm standard EN 943. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Hygiene measures**

Observe normal hygiene standards. Wash promptly if skin becomes contaminated. When using do not eat, drink or smoke. Wash hands after use.

**Process conditions**

Ensure that eye flushing systems and safety showers are located close by in the work place.
